EVERYONE OF US CAN MAKE A DIFFERENCE

WHY WATER?

Access to clean water is one of our most basic human needs. But one-in-four people in the world do not have access to safe drinking water. Unsafe water is responsible for more than a million deaths each year. As a non profit, we partner with local experts and individuals, providing the support they need to bring clean water and sanitation systems to their own communities. Then we ensure they have the resources they need to maintain those systems **now and in the future.**

LAOS

We built a water tower in the village of Ban Natee in the Province of Bolikhamxay. The village didn't have enough water to provide to all families during the dry season. We drilled, found a new source and built an infrastructure allowing a safe water access all year long.

MADAGASCAR

We worked with the community of Soanierana Township to fix 12 waterpumps broken in many villages of this area that lead to deprive thousands of families to have a direct access to safe water for daily needs.

LAOS

The school village of Nampa in the province of Bolikamsay didn't have hygienic toilets for the children neither faucets to wash their hands. With the partnership of the teachers and the villagers, we built for the school faucets with recycle pipes and new toilets.
